

ALLIED HEALTH

why should you be an LPN?

There is an increased demand for LPN's in nursing homes, sub acute care facilities and the home care industry. With the shortage of nurses in these areas there is a greater need for qualified, capable LPN's. Students who choose a career path in Licensed Practical Nursing will find not only a huge demand for their services, but also a tremendous difference in the quality of training available

Why should you choose AVTECH?

Our Practical Nurse program offers the latest state-of-the-art facilities which will provide you with well equipped laboratories and exposure to the most current medical techniques. You will work hand in hand with experienced RN's and other members of the health care industry. Our higher standard for admission criteria means that we accept the best potential candidates for our programs. This gives you, as a student, the confidence of knowing you are part of the AVTECH advantage. Practical Nurse candidates typically have long term goals of possibly continuing their professional education after completing the LPN Certification. AVTECH'S program is designed to prepare you for the next steps in your career. Once you complete the AVTECH Practical Nurse program, you will be ready to continue with future accredited course studies which include BSN and RN to name a few.

Medical Billing and Coding Administrator

To Provide basic understanding of medical billing, to provide hands-on training with medical and insurance forms and medical office automation software, to provide patient management skills. Introduce the technical language of medicine to students preparing for medically oriented career; present an overview of various body systems, incorporating the anatomy and physiology of each. After successful completion of this course, the student will be able to complete medical insurance forms in a physician's office, clinic or a similar health care setting.

About AVTECH:

Established in 1998 with the mission of delivering training to professionals, as well as those looking to advance their skills to the professional level, the Avtech Institute of Technology has more than succeeded in attaining this goal. Catering to the corporate, military, Work Force and private markets, Avtech delivers targeted instruction to students with a desire to advance.
